LAKE VIEW CEMETERY.

Improvements Made During the Past Year Three New Monuments Erected.

Burlington has reason to be proud of her two cemeteries, Green Mount and Lake View, which, in beauty both of na ture and art, are difficult to excel. Though the former cemetery contains the lots of our distinguished towns-Senator Edmunds and Minister Phelps, yet the latter possesses the most Phelps, yet the latter possesses the most attractions for the visitor, and, on account of its greater accessibility probably, is being filled most rapidly. Indeed, so many lots have been taken in the past year or two, that the time is not far distant, when the limits of Lake View will have to be moved northward. Forty lots were sold that we are and there have already been moved northward. Forty lots were sold last season, and thirty have already been disposed of, this year.

The season's improvements are numer-

ous and striking but in this place only the most important can be noted. The thousand and one little nothings, upon which the good appearance of the cemetery depends in a large degree, it is utter-ly impossible to notice at all adequately. Improvement begins even before the entrance is reached, the former apology for a sidewalk having been replaced by a wide, clean-cut, nicely rolled walk extending the entire length of the cemetery front. The pleasing effect of this change has to be seen, to be appreciated. At the en-trance of the grounds, the mortnary chapel the gift of Miss Louisa Howard, has been lately adorned by two handsome urns filled with flowers, standing one on either side of the chapel, and placed there by the same kind heart that erected and gave the building. In this connection it is per tinent to remark that Miss Howard erect ed this chapel for the free use of every de nomination burying in the cemetery is intended to be absolutely non-sectarian more than it now is,

Under the efficient supervision of Mr. der. The grass, for the most part, has been mowed, the roads weeded, raked and straightened, and the trees trimmed. The drives are kept smooth and hard as tables and two new ones through the woods have been opened. They are in no way infe-rior to the macadamized streets of the city, and are free from their disagreeable dust. Mr. Poquet at an expense of over \$200 has filled up the two huge washouts which marred the beauty of the woody bank on the western side, and will soon turf their over. Instead of throwing the trimmings of brush down this bank as heretofore, Mr. Poquet intends to destroy them at once by burning, which intention, if carried out, will be not the least improvement that gentleman has made. The presence of heavy of brush is The presence of heaps of brush in this locality has for years been a great dis-flagration. And the interesting part of the story is that the revenue derived from the sale, cutting and care of lots pays for these improvements and leaves a surplus besides. At the beginning of the fiscal year the City Treasurer held \$8.0 to the credit of the cometery and Mr. Poquet has never had a dollar's appropriation. This fact had a dollar's appropriation. This fact gives the improvements a spice they might not otherwise have.

Mr. Roberts and the First National Bank It is rumored that a secret effort is making to procure the removal of Hon. Daniel Roberts from the receivership of the First National bank of St. Albans, and that the parties to this scheme are quite elated at the prospect of effecting their purpose. No opposition to Mr. Roberts comes from the depositors and other creditors of the bank. They, as well as the community reperally. They, as well as the community generally, are greatly pleased with the capacity and energy he has displayed in endeavoring to collect the assets and to bring the wrong-doers to small elevation had in his hands a chisel which was driven into the falling beam nearly ten inches, and the beam just grazed the man's head. The derrick will be rebuilt immediately. The fall of the block of granite jarred the houses for quite a distance around.

Gen. Henry's Fishing Party

General Henry and his party who have been to the camp of the St. Bernard Club in Comada, for a week's fishing, returned such cause and by such influences. At this stage of the proceedings, this com-munity, to whom the bank is so largely munity, to whom the bank is so largery indebted, and for whom Mr. Roberts has labored with such untiring zeal and fidel-ity, cannot afford to be deprived of his services, and we do not believe that the opposition to him can possibly succeed.
